Dear Doctor

About a month ago I sent you seeds of Sciadopitys pulpy pods with seed vessels and hope they will reach you in good condition.

The testimony is very positive and I think credible; that the Pinus tuberculata, on the head waters of the Middle Fork (of the Willamette) grows not less than sixty feet high

MISSOURI BOTANICAL GARDEN

Accept my thanks for
your Pines, Junipers and
Firs — They will be of great
use to me if I ever get
time to look at a tree
again.

During my absence my
wife gave Dr. Parry for you
my specimens of Sagittaria
I do not know what condition
they were in and she does not
remember but if they are not
satisfactory we will try to
supply you further.

Hoping the last part of
your trip proved pleasant
and that I may sometimes
hear from you, I remain
Yours truly
E. H. Collier
